CUT OFF SAW - PETROL

Useful in construction industries for faster alteration, demolition and renovation works. A handy tool for Railways, Air Force, Army, Mining and many industries for cutting steel bars, beams, scaffoldings, bricks and other structures with ease and saving time, labor and money. It gives smooth and sharp edges on cutting - thus additional installation of windows, doors or air conditioners becomes easy.

It does not damage adjoining structures. For the Fire Brigade Service it is useful to cut metal, shutter, roof, sheet, bar and similar metal sections as also concrete/RCC and other building material during force-entry in rescue operations.
